

Here With Me

Susie Suh

Caught in the riptide
I was searching for the truth
There was a reason
I collided into you

Calling your name in the midnight hour
Reaching for you from the endless dream
So many miles between us now
But you are always here with me

Nobody knows why
Nobody knows how and
This feeling begins just like a spark
Tossing and turning inside of your heart
Exploding in the dark

Calling your name in the midnight hour
Reaching for you from the endless dream
So many miles between us now
But you are always here with me

Oh inside me
I find my way
Back to you
Back to you

Calling your name in the midnight hour
Reaching for you from the endless dream
So many miles between us now
But you are always here with me

Two words
In your hands
In your hearts
It's whole universe

You are always here with me
