From Where I Stand

Suzy Bogguss

Funny, we should meet
The three of us here on the street
You know I've wondered what I'd say

Now the moment's here And suddenly it's crystal clear Some things are never gonna change

From where I stand I see an old famliar story
Only the last time I was in your shoes
Now it's looking like it's my turn to be lonely
And I tell you I don't like the view

I was just like you

For me he left somebody too

And I didn't care if that was wrong

Oh, but now I've found
The tears you cause come back around
And they're coming your way before too long

From where I stand I see an old famliar story
Only the last time I was in your shoes
Now it's looking like it's my turn to be lonely
And I tell you I don't like the view

From where I stand we've got a lot in common and There's a good chance you'll be standing one day Right here

Where I stand I see an old famliar story
Only the last time I was in your shoes
Now it's looking like it's my turn to be lonely
And I tell you I don't like the view

From where I stand I see an old famliar story
Only the last time I was in your shoes
Now it's looking like it's my turn to be lonely
And I tell you I don't like the view
