

# One Clear Moment

Suzy Bogguss

At the far end of the night  
Just before the night  
Just beyond the shadows

Like the flicker of a kiss  
Appearing through the mist  
Surrounded here [Incomprehensible]

So perfectly protected  
Divided yet connected  
That's when I feel the nearest

One clear moment  
When it all falls together  
I wished that it would last forever  
One clear moment like this

Now darling, here we are  
So close and yet so far  
Here and yet so distant

Lying face to face  
Eating our own space  
Hoping yet resistant

But if we just kept quite  
Oh baby, please just try it  
That's when we feel the nearest

One clear moment  
When it all falls together  
I wished that it would last forever  
One clear moment like this

One clear moment  
When it all falls together  
I wished that it would last forever  
One clear moment like this
