

Crash Landed

Sweetbox

Like a bullet intruded deep inside my mind
Going woo woo woo woo
Every moment
There's no way I can escape
Makes me woo woo woo woo
Fall in love a song I sang
Just going around going around going around
It's in my head
Every song, every word, every record I play
Get your voice in my head
Hear you calling my name
Through your lips, through your touch
Every part of me is under your hold
In a minor control
Crash landed
As I'm walking
You are the beating never set
Going woo woo woo woo
When I'm talking
Your words come on my lips
Going woo woo woo woo
Why can't you just let me be
Keep going around going around going around
In my head
Every song, every word, every record I play
Get your voice in my head
Hear you calling my name
Through your lips, through your touch
Every part of me is under your hold
In a minor control
Oh baby, minor control
Crash landed
It feels like I'm falling down
Crash landed
I can not escape the sound
Crash landed
Feel it you alone
Crash landed
Go around in my head
Every song, every word, every record I play
Get your voice in my head
Hear you calling my name
Through your lips, through your touch
Every part of me is under your hold
In a minor control
Every song, every word, every record I play
Get your voice in my head
Hear you calling my name
Through your lips, through your touch
Every part of me is under your hold
In a minor control
Crash landed
