

## Don't Go Away

Sweetbox

In darkness we are all the same  
See the light, stay. (Oh, please don't go away)  
Beauty and the beast we thought  
Would never make it through  
Good and bad never stopped me from loving you  
Your inner beauty, oh, how it set me free  
The fear of loving only what outside we see  
But inside he hides all his passion might  
As he fights inner demons alone at night  
Tonight I search deep inside my soul  
I know what I feel for you, I can't let go  
So please stay, and please know  
That my love is no joke  
And I'm strong and I hope that some day we'll grow old  
Unfold the mould of life as we see it because your love is need  
ed  
Don't go away. You've got to stay  
Don't, don't go away  
Pick your head up, don't frown  
We can survive somehow  
Oh, please don't go away  
Please don't go away. My love is here to stay  
No matter what they say. My love won't fade away  
Today I sit and pray, is everything okay  
Day by day you take my heart away  
In pieces, no reasons 'cause I believe in us  
You're the one I trust. You gave me love  
And never took advantage of my heart  
I loved you from the start  
Please don't break my heart just say you'll stay
