

Understand

Swing Out Sister

When no one knows your name
When everyday's the same
And life's a cruel and vicious game
One minute your up
The next thing you come down
Leaves your head spinning 'round and 'round

Keep delving deeper and deeper
Keep reaching higher and higher
Won't anybody explain what's happening?
Keep getting closer and closer
Still never finding an answer
Forever back but this starts again

Until you understand, understand
What you remember you forget in time
Understand, understand
And say goodbye

Running out of time
The truth can be unkind
Walking out on a love that's blind
Never satisfied
Forever asking why
Hiding behind the tears you cry

Until you understand, understand
What you remember you forget in time
Understand, understand
And leave the past behind
Understand, understand
It's not the first time love will pass you by
Understand, understand
And say goodbye

Until you understand, understand
What you remember you forget in time
Understand, understand
And leave the past behind
Understand, understand
It's not the first time love will pass you by
Understand, understand
And say goodbye
