Pharen height life support, pharen mind the mike in cord  
And everything around it sounded off  
I came to round it off to higher disciple levels  
I set the president, my energies very incredibles  
You're barely accessible  
By the lame and taming animals  
Like lions and tigers and bears  
Locked up in cages and obide is been trying for years  
All they got is a lighter, they round us some smoke and some ears  
It's like illusions it's versus the too prestigious  
The newest leader so feed us, now before I start the carnage  
Will leave you bleeding out and calling for nurses and doctor  
Assistant no resurgence, in the distance it's a certain  
Bright light hallway, corridor choosin door  
Handle turn your handle, burn the freeze upon contact  
Don tread the night spawn, explode upon impact  
Slow you or get back? Or get burnt like jet pack  
A real rock and roll the rollin stone that pay me jetlag
