

All Night Long

SWV

Baby, you can call on me
Anytime that you feel the need
And I'll be there in a hurry
Giving you the best of me
And baby you know I keep it nice and warm to satisfy
Baby you know that I am always hot for you
And if there's any kinda love that will exemplify
My sweetie, I have got that kinda love times two

Boy I'll do you all night long
Do you anyway you want
I will do you all night long
I wanna please you
Don't wanna tease you

You can melt in my body
And I will slowly melt on you
Caress your face in my valley
Let me feel the sweetness of you
And baby you know I keep it special each and every time
I never do nothing once and never quite the same
And baby you know if there is anything you want from me
I will supply so you can have it your way

(Here's the vibe)
Here's the vibe, there's candlelight
As I undress for you, baby
(A sip of wine)
A sip of wine, we take our time
Then I undress you, too
(I look at you)
I look at you, you look at me
And then we both embrace
(Let nature take its place)
And then we just let nature take its place
