

III Jackson

Syd Matters

One thing i recall is my birth
Does it sound that silly?
Wish i had somebody to trust
Do I look like an idiot?

Is there anyone I won't hurt
For bringing me back my vultures?
One thing I recall is my first
Dead flower picture
Jackson lost his mind when he left us
When he started to use
Some strange words in conversations
Hey now, help is on the way now
Help is on the way now
It's over, help is on the way now
Help is on the way now
He'd better recognize us
Better recognize us
Back off, you little sneaking little judge
I was just trying on my own
I am only playing in the mug
This wasn't meant to be shown

One thing I recall is my birth
Does it sound that silly?
Jackson lost his mind when he left us
Shame on priest, Jackson
Oh, up the fence, where did you go?
Between jumping about the difference you know
Is the fog you left behind
All around us
All around us
