Nice Dreams

Symphorce

I close my eyes and drift away The passing of another day I leave the day's despair behind In my bed I finally climb

I never know when they will come And hope tomorrow ain't as long But I'm running on ice, as you can see Oh, they want me

They take me to another place I'm out of hope and time and space They chase my mind like animals Chew my flesh like cannibals

Why they take me, I can't see Oh spare me from this misery Like a child I fear the night Save me from these dreams tonight Nice Dreams.

I close my eyes and drift away The passing of another day I leave the day's despair behind And in my bed I finally climb Surrealistic nighttime fun

But this is not for everyone Some they like it, some they don't Some survive it, some they won't

Why they take me, I can't see Oh spare me from this misery Like a child I fear the night Save me from these dreams tonight Nice Dreams.
