

## Visions

Symphorce

I step into the nightlight  
Feel my breath across your skin  
My depression descends  
Without wasted pain  
And no sorrow within

I'm casting an evil spell on you  
Wake up in an empty room  
Feel me stuck in your brain  
And in your every move

Visions around you  
Help me to find the truth behind  
I'm rising inside your mind  
Far away where you face your dream  
Close your eyes and follow the stream

Release the thoughts inside  
With the blink of an eye  
Save me from myself  
I'm surrounded on every side
