

Let It All Fall

T'Pau

All the world is watching you
What you gonna do
What's your next move
All the things I see in you
Will all come true
If you want them to
Take off the cloak that defends you baby
Let it fall to the ground

Let it all fall away from you
Let it all fall
Just let it fall away
Let it all fall away from you
Let it all fall
Just let it fall away
Don't have to carry this weight alone

Call and I will follow you
Live my dreams through you
Feel extremes through you
And I'm waiting in the wings to prove
I believe in you
Don't you want me to
Take down the wall that divides our feelings
Let it go baby

Let it all fall away from you
Let it all fall
Just let it fall away
Let it all fall away from you
Let it all fall
Just let it fall away
Don't have to labour in this love

One thing you know for certain
I'll help you carry this burden
Let it all fall away

All the world is watching you
What you gonna do
What you trying to prove

Let it all fall away from you
Let it all fall
Just let it fall away
Let it all fall away from you
Let it all fall
Just let it fall away
Don't have to carry this weight
Let it, let it, let it, just let it
Let it all fall, just let it fall away
Let it all fall away from you
Oh, let it all fall, just let it fall away
Let it fall away from you
Just let it, oh let it fall away
Oh, let it all fall away from you
Let it all fall, just gotta let it fall

Let it fall
