## **Moon Coming Over The Hill**

## **Tab Benoit**

I remember that lonesome night
When stars all were shining bright
I was alone, alone until
Until I saw that moon coming over the hill

Now how could I ever have the right To see alone such a beautiful sight You know that night falls dark and still Except for that moon coming over the hill

Now it looks so close up next to the clouds Well, you know it's up there, just checking me out It just rises higher on into the night And it lets me know everything's alright

So don't you worry about where I been I'm just checkin' on one of my old friends You know every night I get my fill When I see the moon coming over the hill

I say, every night I get my fill Seeing you and the moon coming over the hill
