## **Up And Gone**

## **Tab Benoit**

Standing in the doorway speaking your mind And then you're out the door, leaving me behind And every time something goes wrong You're up and gone

You know I surely, surely would love to know Where you go when you walk out that door?
You know I would wait all night long
For you to come home

Oh yes I surely, surely would love to know Where you go when you walk out my door? Lord, every time something goes wrong You're up and gone
