

## Like Roses

Tabitha's Secret

Please don't make me answer you  
The world is big but my circles are small  
And please don't try to shut me out  
I'm in love that's all

I'm not afraid to listen  
If you're not afraid to hear

And please don't laugh, I just can't help  
Grinning when I'm giving it all  
And please don't show, you're face around my place  
I've seen it all before

And I'm not afraid of dying  
But sometimes I refrain

I believe that life goes on like a hurricane  
And you struggle through the pieces till you're not so sane anymore  
And so you want and you suffer till you've had enough  
And in the end, there's a heaven in the cold clear bluff, only want

To come through like roses  
To head fast like a clear stream  
To feel soft like a freight train  
In the middle of a bad dream

All you wanted was to be proud  
Like a rough little soldier  
There's a place where the soul ends  
Comes through like roses  
Comes through like roses

Looking down, I see my cigarette is even  
With the horizon that my feet have made in the blanket  
Looking back I lost the fight it was uneven  
You never gave me time enough to say I was wrong or I was sorry

I can see  
Your head's still spinning like a merry-go-round  
And you're glaring at the people  
Like you've been shut down quarter time

It's a war gonna win  
No matter what it takes  
And you can feel  
Every second of the cold heartache coming down

To come through like roses  
To head fast like a clear stream  
To feel soft like a freight train  
In the middle of a bad dream

All you wanted was to be proud  
Like a rough little soldier  
There's a place where the soul ends  
Comes through like roses  
Comes through like roses

To come through like roses  
To head fast like a clear stream  
To feel soft like a freight train  
In the middle of a bad dream

All you wanted was to be proud  
Like a rough little soldier  
There's a place where the soul ends  
Comes through like roses  
Comes through like roses
