

Eyes, Nose, Lips

Tablo

You left me paralised.
No cure, no rehab for me.
Funny that you've got the nerve to keep asking me
How I've been.
You're the victor in this pageantry.
But the only trophy you deserve...
catastrophy.
I'd rather we'll be death to each other
No eulogies said for each other
No rest in peace's.
The memories got my chest in pieces.

I'm praying that your eyes are the first to go.
The way they looked when you smiled.
The way they opened and closed
Then your nose.
Every single breath against my neck.
And then your lips.
Every empty promise made and said

Please fade fade fade
Fade to black fade do black
Please fade fade fade
Fade to black.
But the nightmares come back

Because yours eyes, nose, lips,
Every look and every breath, every kiss
Still got me dying
Still got me crying
(2x)

Forget a promenade.
Let's juggernaut down memory lane.
Leave no thought alive
To the slaughterhouse I'm takin' my pain.
It's time to sever my brain from my heart and soul.
My knees are burnin' hot
but God is cold.

I've been told:
One day you'll now to much of haevens and sin (haevens and sin)
After the show it's only hell that it brings (hell that it brings)
So take it slow and let time heal everything.
They say that time flyes but you keep braking its wings.

You'll never fade fade fade
Fade to black
Please fade fade fade
Fade to black
But the nightmares come back

Because yours eyes, nose, lips,
Every look and every breath, every kiss
Still got me dying
Still got me crying
(2x)

You wish me well
You wish me well
I wish you hell

I never wanna look into yours eyeses again,
No, I never wanna hear your breath again.
Let me go, let me go,
Baby, tell me this is the end.

Because your eyes, nose, lips,
Every look and every breath, every kiss
Still got me dying
Still got me crying (still got me out of my mind)
(2x)
