

Dark Sky

Tactical Sekt

Look up at the heavens above
I know there's so much more
Blinded by light
The stars above were there before

My father took me by the hand
And showed me the wonders of the sky
Explored the depths of outer space
Time travel with the naked eye

We destroy the earth
Sell her out for gold and oil
We erased the stars in heaven
Allowed our once dark sky to spoil

A synthetic amber glow of ignorance
Cancels out my beloved stars
I once saw constellations infinite
Now my space bares human scars

I can't see the light that hides in the dark
I am blinded by light that destroys the night
Turn the night in to day I can't see heaven this way
I want my children to see what I saw
What I saw
What I now can't see
