

There's something that I wanna keep  
Inside my heart where feelings are soul deep  
Things could get worse day after day,  
I know my dreams would never fade away.

I know you've got soul but you're wasting your time  
Looking for our goal you don't need to find  
So please change your style and start living for a while  
Everything is already there in your heart.

Yeah yeah yeah

It's there when you are asleep  
When you heart beats you can hear it soul deep.

Things could get worse day after day  
I know my dreams would never fade away

I know you've got soul  
But you're wasting your time  
Looking for our goal  
You don't need to find  
No need to find  
So please change your style  
And start thinking for a while  
Everything is already there in your heart.

Yeah

I only want you to try something new  
I only want you to believe in you  
That's what you have to do.  
Trust me, it's true.

That's what you have to do.  
La la la la la la la  
That's what you have to do.

There's something that I wanna keep  
Inside my heart where feelings are soul deep.

I know you've got soul  
But you're wasting your time

Soul deep, something I wanna keep.
