Beautiful World

Here standing in the rain The sun has gone again and nothing's gonna change Time, I need a little time As you slip out of sight And nothing heals the pain

And I know that it's you That's stopping me from falling Crashing down, losing ground 'Til I see you again And you know

[Chorus]

The sun will shine, and we will see There's nothing standing in our way Love will stand and never break I never thought this could be me Do you feel what I feel Every time that you are near it's a beautiful world A beautiful world

Words are hard to keep inside Even though I've tried, impossible to hide And you know that it's me That's stopping you from falling Crashing down, losing ground 'Til I see you again And you know

[Chorus]

I'll be the stars guiding you
I'll be the place that you hide
I'd run a thousand miles, a thousand miles
To be by your side

[Chorus]

Take That
