

## I'd Wait for Life

Take That

There's a place we used to be  
There's a face that I used to see  
There's a picture with you by my side  
There's a moment that I want to find.

I don't know where to start  
Or how to begin  
But I know I love you still.

If you ever turn away  
If you ever change your mind  
If the road ahead becomes too hard to climb  
If there's something in your heart that tells you to stop  
Oh to hold you close tonight  
I'd wait for life.

There's a voice shouting inside my head  
There's a space on your side of the bed  
There's a hope every time there's a sound  
There's a silence that's playing too loud

I don't know how you are  
Or how you may be  
But I know I love you still.

If I close my eyes  
I'll dream a little deeper baby  
Cause you are always on my mind  
Yeah you are always on my mind  
For life.
