

# It's All for You

Take That

The world is smiling  
It's a little brighter  
There's less politics  
A little more laughter  
Wars become silent  
Everything's different  
Nothing is hurting  
And it's all working  
Look at the courage  
That's emanating  
Saving the hearts  
That were breaking  
Oh yeah, it's coming  
To those who are waiting  
You know that it's true

It's all for you  
The sun and the clouds and the blue  
It's all for you  
It's coming in bloom for you

Birds are singing  
Quiet celebration  
Right through the universe  
And all across the nation  
Tired hearts hoping  
Building what was broken  
A strength in the community  
A reason to believe  
Look at the message  
It's high and low  
If you don't listen  
You'll never know  
Let go of your chains  
Oh, come out of your cage  
The road it's all leading to

It's all for you  
The sun and the clouds and the blue  
It's all for you  
It's coming in bloom for you

Everyone around you  
Everyone that's missing  
'Til the light can find you  
No one's gonna know  
Everyone around you  
Everyone that needs you  
No, don't leave us waiting  
Everyone should know

Everyone around you  
Everyone that's missing  
'Til the light can find you  
No one's gonna know  
Everyone around you  
Everyone that needs you

No, don't leave us waiting  
Everyone should know

It's all for you  
It's all for you  
It's all for you  
It's waiting here for you  
It's all for you  
It's all for you  
It's all for you  
It's waiting here for you  
High in the clouds above  
You know, you know  
It's here for you  
Waiting here for you
