

## New Day

## Take That

Woke up from a bad dream  
I was feeling half-naked, running down the high street  
Shouting your name, I was begging you not to go  
Yesterday's news is yesterday's news  
Yesterday's blues is just a shade of colour  
Call me naive but we're building for tomorrow  
So we can  
So we can finish off what we started

Wake up, it's a brand new day  
Everybody's gotta sing this storm away  
So come along now, lead the way  
Ooh!  
Make way through the waterfalls  
'Cause together we will soon get it past it all  
No one ever needs to fall  
No one ever needs to fall  
No one ever needs to fall

All into position  
One final frontier 'til we make it to the station  
Heading up to Zion, listening to the radio  
Too much to regret, yeah  
Still [?]  
I'm not a multi-tasker  
Talking revolution, talking revolution  
I talk about you all the time

Wake up, it's a brand new day  
Everybody's gotta sing this storm away  
So come along now, lead the way  
(So come along now, lead the way)  
Make way through the waterfalls  
'Cause together we will soon get it past it all  
No one ever needs to fall  
No one ever needs to fall

We can lose it all, can lose it all tonight  
We can make it out, can make it out alive  
If we can give it all, can give it all the time  
We can finish off what we started

Wake up, it's a brand new day  
Everybody's gotta sing this storm away  
So come along now, lead the way  
(So come along now, lead the way)  
Make way through the waterfalls  
'Cause together we will soon get it past it all  
No one ever needs to fall  
No one ever needs to fall

Every morning it is a brand new day  
Every morning it is a brand new day  
Every morning it is a brand new day  
Every morning it is a brand new day  
Every morning it is a brand new day  
Every morning it is a brand new day

Every morning it is a brand new day  
Every morning it is a brand new day
