

## Nobody Else

Take That

Making my way through photographs  
Of the night when you first stood by my side  
Old friends with smiles some are here some are gone  
Good memories of our senior high  
Looking back we're the only couple still together  
Even then I knew this love would be forever, I knew

Cause there's nobody else in the world that could love you  
Anymore than I do, always here for you  
Nobody else in the world could love you more  
Nobody could love you anymore than I do  
I'm still here for you

Our lives have all changed we've come a long long way  
Our faces show the lines of two young songs  
And in their houses there will be pictures  
Like the ones of you and me  
Hope they can look back and smile just like we have done  
Never once have I felt the need for another  
We were strong and survived the storm in time to discover

Cause there's nobody else in the world that could love you  
Anymore than I do, always here for you  
Nobody else in the world could love you more  
Nobody could love you anymore than I do  
I'm still here for you

All of the smiles we have won  
Just from looking back and reliving all the good times  
And when we've been through all the pages  
We just start again, oh

Cause there's nobody else in the world that could love you  
Anymore than I do, always here for you  
Nobody else in the world could love you more  
Nobody could love you anymore than I do  
I'm still here for you
