

# Rocket Ship

## Take That

When darkness filled me  
With expectation  
Could not see things straight  
Or find my angel  
I was a lost soul  
Without a road map  
And out of body  
Experience

Then you held out your hand  
Like I hoped that you would  
Saying not to let go  
Don't you dare let me go  
Then you asked me to stay  
No way I couldn't move  
Then you held me so tight

And it's making me better now  
Almost human now  
Made it up somehow  
Played with my head  
I'm feeling much better now  
Won't be under now  
I've got stars  
Over my head

I prayed for reinvention  
A final resolution  
A catastrophic consequences  
And solution  
I was a wise man  
Without a gold star  
A lonely soldier  
Without a cold war

Then you held out your hand  
Like I hoped that you would  
Saying not to let go  
Don't you dare let me go  
Then you asked me to stay  
No way I couldn't move  
Then you held me so tight

And it's making me better now  
Almost human now  
Made it up somehow  
Played with my head  
I'm feeling much better now  
Won't be under now  
I've got stars  
Over my head

I've got you back and in my mind  
Turned your mother ship back home  
Like a rocket ship in the galaxy  
We were back where we belong

And I'm not afraid  
I haven't felt quite this way for so long now  
I can't explain  
Anymore

I've got you back and in my mind  
Turned the mother ship back home  
Like a rocket ship in the galaxy  
We were back where we belong

I've got you back and in my mind  
Turned the mother ship back home  
Like a rocket ship in the galaxy  
We were back where we belong

And it's making me better now  
Almost human now  
Made it up somehow  
Played with my head

I've got you back and in my mind  
Turned the mother ship back home  
Like a rocket ship in the galaxy  
We were back where we belong

I'm feeling much better now  
Won't be under now  
I've got stars  
Over my head

I've got you back and in my mind  
Turned the mother ship back home  
Like a rocket ship in the galaxy  
We were back where we belong
