

Locked And Loaded

Take The Crown

With days gone by
We're just marking our territory
Follow these lines
They lead us away from
Everything we don't understand

We've been watching from the bottom for so long
We've been waiting too patiently
Now we're running around kicking your door down
We're coming out swinging

I don't know why we fell in love with second chances
I don't know why we fell in love at all

This is the first, not the last time
We'll have them by their neck with this line
Can't you see we're not pretending
Can't you see we're not pretending

So we are young and in over our heads
Exactly where we want to be, want to be

We've been digging in the trenches for so long
We've been walking on these street
Come too far and there's no looking back now
We won't settle for anything
I don't know why we fell in love with second chances
I don't know why we fell in love at all

This is the first, not the last time
We'll have them by their neck with this line
Can't you see we're not pretending
Can't you see we're not pretending

All you know
We shoot with steady hands
All you know
We've got a motive

All you know
We shoot with steady hands
All you know
We're locked and loaded

Honesty can be made with honest living
Based on wishful thinking

We've got stars in our eyes
Dreams of our names in lights

This is the end of the beginning
