

Fail

Takida

I can feed your hunger, turn water into sand
I could start a riot with just one open hand
I can make the fascists under, understand their faith
Make the devil cry, a snap and he'll fade away
But I
Can't have you, I fail all the time
I can't fool you to stay, no
I can start a new religion and it will never die
I could crush a dream with just a blink of an eye
Make the machine feel
And create truth from lies
Set the world on fire and bring you the endless sky
Bring you the endless
But I
Can't have you, I fail all the time
I can't fool you to stay, no
I'm hanging by a moment, it's an endless fight
That feeling when you came into my life
I cannot help failing all the time, time
But I
Can't have you, I fail all the time
I can't fool you to stay
I'm hanging by a moment, it's an endless fight
That feeling when you came into my life
I cannot help failing all the time
All the time
O-oh
O-oh
O-oh
Bring you the endless
Bring you the endless
