

Something New (Get Off)

Tal

You gotta get off what they say
Get off the cray cray
Get off the same thing
Get off the lame
When you gon gon do something new
When you gon gon do something new

You gotta get off the cliché
Get off the hearsay
Get off ya chest what the fuck you tryin to say
When you gon gon do something new
When you gon gon do something new

Even on them nights that's cold
When it seems the world
Is tryin to get you down
Ya backed up in that tiny corner
Wit a sad face on and you feel alone

That's when its time to change the tone
Switch the lights back on
Let ya hair down some
Don't let em keep you from that gold
When you know that second place don't do
Wait, hold up
Cause while you chasing your cake
And ya cash and your car
I tryin to cop me a rocket
To ball out Mars

You gotta get off what they say
Get off the cray cray
Get off the same thing
Get off the lame
When you gon gon do something new
When you gon gon do something new

You gotta get off the cliché
Get off the hearsay
Get off ya chest what the fuck you tryin to say
When you gon gon do something new
When you gon gon do something new

Face it with ya best foot forward
The stillettos kill em' every step you own
Even if you see them politican
Who cares if they snitchin'
Life will still go on

You gotta get off what they say
Get off the cray cray
Get off the same thing
Get off the lame
When you gon gon do something new
When you gon gon do something new

You gotta get off the cliché

Get off the hearsay
Get off ya chest what the fuck you tryin to say
When you gon gon do something new
When you gon gon do something new
