

Turn Your Head Around

Tank

I can really safely say I'm glad you're still alive One thing they can't take away Is your will to survive

I don't I won't believe it I don't I won't believe it They say you cannot be found This man is better off dead

They want to turn your head around Turn your head around Turn your head around Turn your head around

How can they leave you lying there Hiding from the lights They don't know and they couldn't care They'll be dead by tonight

Someone's made a big mistake I can't believe my ears Just how long will this thing take Give him days, months and years
