

# War Machine

Tank

Bring us not to ruin, the fight is never over, till it's over  
A politician lies and young men and women give up their lives  
Where evil finds its way, we will meet it and send it away

All praise the War Machine - Hail! (2x)

We watch them hiding in their lairs, at last to meet their maker  
Terror in those eyes as they ask "Have you come to save me?"  
Some things we never learn and it's so wrong, let's take a stand, oh

War Machine  
Still it turns, then it burns

Now we've come to praise the War Machine - Hail!  
All praise the War Machine - Hail! /x3  
Watch it burn

Now we've come to praise the War Machine - Hail!  
All praise the War Machine - Hail! /x3

And as you lie before them now, the masters of your destruction  
Their pockets lined with gold, let your past rise up to haunt them  
You tyrants in our midst, we despise you, soon you'll be gone,  
no  
War machine  
Still it turns and it's so wrong

Now we've come to praise the War Machine - Hail!  
All praise the War Machine - Hail! (3x)

Watch it burn  
Bring us not to ruin  
Bring us back our lives  
War Machine keeps turning  
War Machine keeps turning on  
See on front they lay down  
See the blood on the ground  
War Machine keeps turning  
War Machine keeps turning on and on and on  
Come and save our world  
Let's bring it, let's praise it  
War Machine  
Praise the War Machine
