Planetwide Suicide

Tankard

Modem speed is what you'll need
To get access to the heat
Surfin' the net
Data goes straight to your brain
Don't give a shit
'about reality and it's pain

Online time is just for free
Touch the screen and you will see
Silicon dreams
Powered by the god we obey
Millions of links
Leading to the one and only page

Planetwide suicide
Click and get ready to die
Planetwide suicide
We'll be deleted tonight
Planetwide suicide
Cleaned earth in pale morning light

Hypnotized, one by one
Global madness, it is done
No turning back
Take the gun or just cut your throat
Broken the necks
All the humans died alone at home

Robots walk uncontrolled
Taking over, that's the goal
Circuits and steel
No more blood and no fragile bones
Weakness been killed
Machines are runnig now by their one
