

# Time Warp

Tankard

One month in full coma  
My life destroyed by gunshots  
Lost my job, lost my girl  
Frustration, fading memories

Black and white, black and white  
The world appears in black and white  
Dragged myself through subway stations  
Ripped apart by poverty

Neon sky, neon sky  
I drowned beneath a neon sky  
Then i heard of famous scientists  
Who did look for volunteers

Time warp again  
I have to set things right  
The next time no mistakes, my friend!  
Time warp tonight  
Time warp again  
I have to set things right  
The next time no mistakes, my friend!  
Time warp tonight

Travel back, travel back  
I had the chance to travel back  
Riding eight weeks down the timeline  
Hyper jump into the past

Energy, energy  
My body filled with energy  
I arrived but there's the problem  
There is still my old-time-me

Time warp again  
I have to set things right  
The next time no mistakes, my friend!  
Time warp tonight  
Time warp again  
I have to set things right  
The next time no mistakes, my friend!  
Time warp tonight

I brewed an evil plan  
How to reclaim my world  
How to get rid of me  
How to regain my girl

Lay in ambush with a sniper  
A bloody rifle on the roof  
Fired once, fired twice  
Shit i thought i shot myself

I brewed an evil plan  
How to reclaim my world  
How to get rid of me  
How to regain my girl

Read the story in the paper  
And now i realize  
Caused a time-paradox, repeating  
Old-time-me is still alive!

Time warp again  
I have to set things right  
The next time no mistakes, my friend!  
Time warp tonight  
Time warp again  
I have to set things right  
The next time no mistakes, my dear!  
Time warp tonight
