We're Coming Back

Tankard

We're coming back, we're coming back We're coming back to you We're never gonna go away again Hold on a little longer, try a little harder 'Til we're arm in arm together to the end

So remember, out there somewhere You've got a friend, and you'll never walk alone again

Don't get worried, don't get scared We're fighting to get there Never doubt we're gonna get through We're gonna run, we're gonna crawl, kick down every wall It won't be long we're coming back to you

So remember, out there somewhere You've got a friend, and you'll never walk alone again

We're coming back, we're coming back
We're coming back to you
We're never gonna go away again
Hold on a little longer, try a little harder
'Til we're arm in arm together to the end

So remember, out there somewhere You've got a friend, and you'll never walk alone again
