

The Past Is The Past

Tantric

I stand here with arms down
Not heated, I've calmed down
It's just I felt you slip away for me
Like you didn't even know me

Oh, like you didn't even care
About the life we build for us
Only, only, only for us
Only, only, only for us

Before you stand your ground what are you doing?
'Cause everything around us will be ruined
Again we'll have to search for what we had
When the past is the past

It's just that it pains me
To know that you don't feel me
Through all mistakes that we had overcome
I never thought this'd be the one

Oh, I guess this life will always have a way
Of finding us at bay
Like us, like us it fades away
Like us, like us it fades away

Before you stand your ground what are you doing?
'Cause everything around us will be ruined
Again we'll have to search for what we had
When the past is the past, when the past is the past

Before you stand your ground what are you doing?
'Cause everything around us will be ruined
Again we'll have to search for what we had
When the past is the past

Before you stand your ground what are you doing?
'Cause everything around us will be ruined
Again we'll have to search for what we had
When the past is the past
