

## Time And Distance

Tanya Tucker

There is a place down in Tennessee I call home  
There is someone down there I call my own  
At least I think he is, Lord I pray he is  
Least I could do is give him a call

Our love across the miles is holding strong  
With every sign of going on and on  
Least I hope it will, Lord I pray it will  
But there is a danger still 'cuz we know

That time and distance will do their level best  
To build a wall between us and put love to the test  
The doubt and temptation step in and take control  
Calling on suspicion to come and take it's toll  
We can't lead love down the path of least resistance  
We've got to hold our own against time and distance

They say out of sight out of mind  
But I say love like ours can hold the line  
I'm here to say they're wrong, I hope and pray they're wrong  
And we can keep love strong 'cuz we know

That time and distance will do their level best  
To build a wall between us and put love to the test  
The doubt and temptation step in and take control  
Calling on suspicion to come and take it's toll  
We can't lead love down the path of least resistance  
We've got to hold our own against time and distance  
We've got to hold our own against time and distance
