

# What If We Were Running Out Of Love

Tanya Tucker

Everybody's wonderin' how this world will get around  
Now that we're all runnin' out of gas  
But me, I'm kinda happy that this world is slowin' down  
Seems to me we were movin' much too fast

Now folks are gonna have to slow it down  
But that won't stop this world from goin' round  
Well I could think of a whole lot worse of things to be out of  
What if we were runnin' out of love?

Now everybody's thinkin' that this world will fall apart  
If we ain't got no fuel to feed the flame  
What if we all lost the love we used to fill our hearts  
Seems to me life wouldn't be the same

Now folks are gonna have to slow it down  
But that won't stop this world from goin' round  
Well I could think of a whole lot worse of things to be out of  
What if we were runnin' out of love?

Now everybody's wonderin' just how cold it's gonna get  
And how they're gonna keep each other warm  
The simplest solution to the problem I've seen yet  
Is cuddle up with someone in your arms

Now folks are gonna have to slow it down  
But that won't stop this world from goin' round  
Well I could think of a whole lot worse of things to be out of  
What if we were runnin' out of love?
