## Take It

Taproot

I gave it a chance I walked on glass And what did it get me Nothing I opened up I showed you love Why couldn't I see this Coming I've made mistakes but you take the cake But it's bitter so take it

The end of days A forceful change I've tried my best You were never there for me

You broke my back and played me You won just by driving me crazy You know i'm gone but maybe There's still another breath of life out there for me

I played the same, but you changed the game I'm not gonna take it Sitting I'll be the man, the better man The bitter is sweet when you taste when Standing

A sacred life Has been denied I've tried my best You would never care for me

I hear what you say, I've seen my mistakes And I know i'm okay Cause you're driving me crazy
