

Time

Taproot

Time
Just a counter-clockwise in motion
Time
It requires strength, love, and devotion
Time
A dictation of every person
Time
Is used to make us free again

When we can turn back time, to any time
By moving on inside
And will we still ask why about the time
Or be just fine inside of our minds?

Time
Grows things older, faster when you find it
Time
It's wasting away while we spend it
Time
A reflection of our past with it
Time
Is used to make things right again

When we can turn back time, to any time
By moving on inside
And will we still ask why about the time
Or be just fine inside of our minds?

I can see this coming over my mind
Cause you're right
It's life, my light

When we can turn back time, to any time
By moving on inside
And will we still ask why about the time
Or be just fine inside

When we can turn back time, to any time
By moving on inside
And will we still ask why about the time
Or be just fine inside of our minds?

Our minds
Because you're right
Inside our minds
Minds
