Ha ha I love you I love you yeah for all that you are I love you
u I love you yeah my star
And you never gave my love away always hold on and what ya'll put
together
Let no one bring us under

When am far away she always wait
(I love you) (3x)
Even when am far far away she
Never give my love away no no

With all that I put you through I've got to give you credits cause

Hold it and that separates us from the rest jah bless yeah with

What's mine is yours girl and with you I want to live and what
ya'll put together let
No one bring us under

When am far away she always wait
