

Stay With You

Tarrus Riley

Yeah heeey

We've been together for a while now
Growing stronger everyday now
Feel so good and there is no doubt
I will stay with you
As each morning brings the sun rise
And the flowers bloom in spring time
On my loving you can rely
I will stay with you

Oh I will stay with you
Through your ups and your downs
I will stay with you
With no one else is round
When the dark clouds away
I will stay by your side
And I know will be all right
I will stay with you

Though relationships get old
And have the tendency to grow cold
We've got something like a miracle
I will stay with you

Oh I will stay with you
Through your ups and your downs
I will stay with you
With no one else is round
And when the dark clouds away
I will stay by your side
And I know will be all right
I will stay with you

There'll be heartaches and pain yeah
Though it all
We'll remain
In this life we all know
Friends they come
Friends they go
But through the years I know I will stay
And in the end we'll find
Love so beautiful and divine
We'll be lovers for a lifetime I will stay with you

Oh I will stay with you
Through your ups and your downs
I will stay with you
With no one else is round
When the dark clouds away
I will stay by your side
And I know will be all right
I will stay with you
Oh I will stay with you
Through your ups and your downs
I will stay with you
With no one else is round

When the dark clouds away
I will stay by your side
And I know will be all right
I will stay with you
