Superman

Tarrus Riley

Ooohhh... Shoooo... Do, do, do, do, dooo...

I'm a superman thanks to Lois Lane Kissed away my problems when I went insane Took me from the depths when I lost my name (oooh) Give me something I could live for Now everyone is wondering what's the change They don't recognize I have so much to say And I never thought someone could love someone So much that they give up on everything Jah knooow...

I will be there when you need me I will be there when you cry baby I will be there when you need someone to tell you That you're beautiful baby

I will be there when you need someone to run with I will be there when you need someone to dance with I'm your lover till the sky turn gray girl Cause you're beautiful baby

Yes, you're beautiful Oh you're beautiful Yes, you're beautiful baby Yes, you're beautiful Yes, you're beautiful Yes, you're beautiful baby

Feel butterflies when I'm in your hands You can turn the pavement into white sand You can make a moment, a memory in a glance And I can't believe anyone else And everybody's talking You're always shining You never stop glistening baby And I never thought someone could love someone So much that they give up on everything Jah knooow...

I will be there when you need me I will be there when you cry baby I will be there when you need someone to tell you That you're beautiful baby

I will be there when you need someone to run with I will be there when you need someone to dance with I'm your lover till the sky turn gray girl Cause you're beautiful baby

Till it's beautiful Oh you're beautiful Yes, you're beautiful baby Yes, you're beautiful Yes, you're beautiful You're beautiful baby

(Beautiful)
Beautiful...
(Beautiful)
Beautiful... ooh

There's a million people underneath the sun That can find a million more but never find the one There's a girl who did this and a socialite Was on magazines, was the shy type I'm a superman thanks to Lois Lane Kissed away my problems when I went insane And I never thought someone could love someone So much that they give up on everything Ooh-aah...
