

# Shower Girl

Tata Bojs

what planet are you from  
who's your father if your mother's eatrh  
hey boy I'm your shower girl  
in the shower of stars of a cosmic swirl

what's that smile on your face  
looks like you're heading to outter space  
head and shoulders in the milky way  
now your smile's miles away

I soak in water  
I melt in liquid dreams  
as I get closer  
I'm taken down by the shower streams

When I change into the clouds of foam  
I wonder will I ever find my way back home  
if the bath takes you too long  
I won 't no longer know where I belong

I clean your skin and bring new shine to your stars  
you start to talk and say you come from Mars  
I as well wash away all the dirt and pain  
It's obvious I'll end up in the black hole of drain

I soak in water  
I melt in liquid dreams  
as I get closer  
I'm taken down by the shower streams
