

Lonely In Space

Tata Young

Deep in the walls of my mind
My reason is blind
For keeping you a secret
I like to think about you
You know that I do
And for a moment I believe, I'm

In a place, far away
I'm in a world of my own, yeah
Its way beyond, anything
A pleasure I've never known
I see

There's a million stars
Dancing like fire
But its lonely in space
It can feel so good
When you're lost in desire
But its lonely in space
So lonely in space

You got a look that I like
You really excite
Every fiber in my body
How I've imagined your touch
The way that you'd feel
And for a moment I'll believe, I'm

In a place, far away...
I'm in a world of my own, yeah
Its way beyond, anything
A pleasure I've never known
I see

Far in space, lonely in space
Lost in desire
Far in space, lonely in space
