Superhypnotic

Call this fascination You keep goin''round inside my head You're like a song that's playin' on and on

Tell me how you did it Got the whole room spinnin' My body starts to shake With every breath you take

Boom Boom Boom You got your arms around me holding tight Boom Boom Anything you wanna do I'm with you tonight

Slowly moving into position Like a beat from a kick drum You're so boom boom superhypnotic Floating from the floor to the ceiling You know I got to feel it One more time, rewind that's right superhypnotic

Don't stop what you're doing The vibe will be ruined Just keep movie' on the one, the three baby

It's so absolutely Right on point how you move me Attracted like a magnet I could get used to this

And I'm mesmerized each and every time I feel your fingertips Run up and down my skin

So I close my eyes, realize I belong to you And I can't help but just give in
