## Let's Spend The Night

Left me here on a rainy day Somehow I knew this would come Silent room full of memories Now I wake to find that everything's gone

It could have been, I think to myself A blessing that I'll never know And if it seems I'm trying too hard Give me the strength to let go

It's the last time that we'll have together It's the only thing left in our lives But as long as we still have each other Let's spend the night

Find myself a better life you used to say Now your dreaming has finally grown Even though you are near and the answers so clear I can't do it, I can't let you go

And if it seems I'm falling behind It's hurting me more than you'll know

It's the last time that we'll have together It's the only thing left in our lives But as long as we still have each other Let's spend the night

I remember the line that you gave to me 'Bout the day and the rest of our lives Now that you've found your place to be It'll kill me if you're not around

It's the last time that we'll have together It's the only thing left in our lives But as long as we still have each other Let's spend the night
