

Come In With The Rain

Taylor Swift

1. I could go back to every laugh
But I don't want to go there anymore
And I know all the steps
Up to your door
But I don't want to go there anymore
Talk to the wind, talk to the sky, talk to the man with the
reasons why
And let me know what you find

R: I'll leave my window open
Cause I'm too tired tonight to call your name
Just know I'm right here hoping
that you'll come in with the rain

2. I could stand up
And sing you a song
But I don't want to have to go that far
And I, I've got you down, I know you by heart
And you don't even know where I start
Talk to your self, Talk to the tears, talk to the man who put
you here
And don't wait for the sky to clear

R:

I've watched you so long, screamed your name
I don't know what else I can say

R:

I could go back to every laugh
But I don't want to go there anymore
