

# Blackened The Sun

Tech N9ne

As The Sun Falls  
Darkness, Shall Come

I went outta my way to do music for you.  
I did shit with E40, Scarface, everybody  
All your heroes, nigga Yukmouth.  
All that shit. Now I'm about to do a It my way,  
I don't give a fuck what y'all think about me.  
Call me devil worshiper, nigga?  
You think that shit's bad?  
Listen to this, muthafucka!

How do I describe my pain?  
It just rains and it rains  
At the same time flame-ah  
I am bane, insane in my veins,  
No restraints can chain or contain me,  
I'm dangerous!

When I gave you my light,  
It was wrong, wasn't right,  
Ain't no love was in sight when I needed.  
So I run with the night  
In the songs that I write  
If I be violent, then I wont be defeated.

It's jet black in my brain,  
'Cause the hatred you gave me  
Has turned me to twisted.  
You dont like this,  
Suck my dick,  
All the kids with the sickness  
Been waiting for this shit!

I wanna get into the mind of your youngest,  
Fill it with fungous,  
And grow it 'til it's humongous.  
Psycho alumnist, the tip of the tongue slip,  
Urgin' you punk bitch,  
Eat shit from your dung pit.

Everyone are you ready for doom,  
Because I've blackened the sun,  
And I've bloodied the moon.  
I bring gloom when I step in the room,  
With the fumes of a tomb,  
I consume all the light in the day.

Everyone are you ready for doom,  
Because I've blackened the sun,  
And I've bloodied the moon.  
I bring gloom when I step in the room,  
With the fumes of a tomb.  
Flowers bloom when Im taken away

I've got this cloud inside that's consuming my mind,  
All the brown in my eyes are dissolving,

Into the whites of my eyes now the night will arise  
And I'm hype cause the beast is evolving  
Step into my dreams, lot of bleeding and seaman and green rotted demons  
And they feed thier seeds collard greens filled with feces and cheese pieces

Of human cerebrum this evening (stay away)

Cause everything I touch turns to mold (If you want me)  
Everything I fuck, Striaght explodes  
(Are we there yet)  
(Are you scared yet)  
(Look at the pussy in your pants, wanna share that)  
(Let me in Imma rip it then Imma tear that)  
(I'm tryin' to eat it, bitch where the mothafuckin hair at?)

Everyone are you ready for doom,  
Because I've blackened the sun,  
And I've bloodied the moon.  
I bring gloom when I step in the room,  
With the fumes of a tomb,  
I consume all the light in the day.
