

# Torrid

Tech N9ne

Your light, casting back the dark night  
Even faster than we, could fly  
Out of that, the sun beams for me

I been burnin' in my own hell for the duration  
Of escapin' this place and it swept across the nation  
That place is pain and tribulation  
Instead of wastin' this achin', I give it all wicked and motivation  
Yeah, I burn so you won't have to  
I rap through fire flame you wouldn't wanna adapt to  
This trying is totally tough, Tech is turbulent  
I further vent to the masses who are watching on this obscure event

Your light, casting back the dark night  
Even faster than we, could fly  
Out of that, the sun beams for me

Feel as the fire consumes you through  
Know that it's scorchin' just for you  
Burn the way that you want it to  
Only the torrid make it through

My pain lessens theirs because it puts who they put on a pedestal on a level  
playing field with them

I go through hell and I share it with you  
Arid quick to cleanse me and get the merits you care to issue  
A therapist who swore it gets you through a crisis  
Soon as I write this, you invite this terror to view  
So much death around me, stress to drown me  
You get the sound we invest checks to crown me  
The frown free, but no matter how loaded, I'm down deep  
Double 'e' 'p' in amidst of a mess, N9ne is tougher than bounty  
Torrid

Your light, casting back the dark night  
Even faster than we, could fly  
Out of that, the sun beams for me

Feel as the fire consumes you through  
Know that it's scorchin' just for you  
Burn the way that you want it to  
Only the torrid make it through

Why is it me that gotta be the light source  
Through my darkness, I created a bright force  
The book told me, "Behold a white horse"  
But I didn't fear the death, I'd just report it, I am your life's torch  
The pain shows and fame grows  
Angel Heart and Evil Brain chose insane flows  
To try to control the direction the flame goes  
It aims low, then it build up and the thing blow  
I don't know why it's the darkness that they desire y'all  
Hotter than mixing 151 with grain and fireball  
But that emotion made my entire empire ball  
I guess I was a chosen one so God gave me this dire call

(x2)

Nature's eye between you and the Escape tonight
