

Slow Down

Teddy Geiger

You say my heart
It shines so bright
The colors fade when too much light's exposed
Time will tell where we end up
How chemicals will change our varied role

So slow down
Take your time
Cause every minute is your life
Yeah slow down
Take your time
Cause every minute is your life
Catch your breath
Catch your breath again
Catch your breath

Catch your breath

Well let's unravel, open wide
Covering each inch of time we own
Time is not to hold on to
Nothing you can do to take control
But and I know I can't hide, that's my life

So slow down
Take your time
Cause every minute is your life
Yeah slow down
Take your time
Cause every minute is your life

Catch your breath
Catch your breath again
Catch your breath

Just catch your breath again

Well time flies so fast
When time flies
Fall away from here

Take your time
Cause every minute is your life
Yeah slow down
Take your time
Cause every minute is your life
Slow down
Catch your breath again

Yeah, slow down
And catch your breath again
Your breath again, breath again
