Sweeter Than The Truth

Teddy Geiger

I broke down and let them save you, oh And the car pulled out the driveway Wave goodbye it's been so long You took that medicine they gave ya, oh Are you feeling any better Cause it's looking like you aren't Since they took you away

I've been thinking and I've got a lot to say

I brought a picture of us Do you remember when we used to get together Hold hands and say forever baby How could we get back to that place I said I didn't but I really missed ya All the things in my life Every one of them reminds me of you We'll never get back These memories and photographs Maybe it's just better I remember these pictures So much sweeter than the truth

Without you anger's lost its flavor, oh No more yelling, no more fighting So I leave the TV on With no pay per view or cable Sings as sweetly as my baby Oh I miss it every day Since they took you away

I've been waiting just to hear you say my name

I brought a picture of us Do you remember when we used to get together Hold hands and say forever baby How could we get back to that place I said I didn't but I really missed ya All the things in my life Every one of them reminds me of you We'll never get back These memories and photographs Maybe it's just better I remember these pictures So much sweeter than the truth

So many nights So many days awake And I thought life without you would be easy living I brought a picture of us Do you remember when we used to get together Hold hands and say forever baby How could we get back to that place, oh I said I didn't but I really missed ya All the things in my life Every one of them reminds me of you We'll never get back These memories and photographs Maybe it's just better I remember these pictures So much sweeter than the truth
