

I Should Get Up

Teddy Thompson

Depression looms
I'm such a miserable fool
I stay in bed
I don't wanna go to school
But I see the sun
is beating down
No excuses from the clouds

I should get up
I should get out
I'm sure there's something
I can't do without
I should get up
I should get up
I should get up

I've heard it said
that life will pass you by
Live underground pretty soon that's where you lie
But I feel so warm in my room
I'm safe and sound
inside my tomb

I should get up
I should get out
I'm sure there's something
I can't do without
I should get up
I should get up
I should get up

The world goes on without me
I know it
I know it
No one misses
the quiet kid
And there are things
I may have missed
But living ignorance is bliss
I'm so wrapped up in myself
I got no time for
Everyone else

I should get up
I should get out
I'm sure there's something
I can't do without
I should get up
I should get up
I should get up
I should go out
I'm sure there's something
I can't do without
I should get up
I should get up
I should get up
